
SOCIAL CONDITION

PREFACE

This issue of the *Social Condition Part of the Statistical Register of New South Wales* contains statistics for 1971, and earlier years.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the latest figures in the principal statistical series, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth authorities and to others who have supplied information, often at considerable trouble.

R. G. Walker

Deputy Commonwealth Statistician
and
Government Statistician of New South Wales

Bureau of Census and Statistics,
Sydney.
10 April 1973.

EXPLANATORY NOTES

Section I—EDUCATION

Public and Private Schools

1. Statistics relating to public and private schools, and the pupils and teachers in them, exclude evening and technical colleges, business colleges, private kindergartens and nursery schools, and (with the exception of Table 22) subsidised public schools.
2. Effective enrolment is the actual enrolment on the first Friday in August in each year, excluding pupils believed to have left the school.
3. Under the new system of secondary education, which was introduced in 1962, the full secondary course comprises a four-year course leading to a School Certificate examination (formerly a three-year course leading to an Intermediate Certificate examination) and a further two-year course leading to a Higher School Certificate examination (formerly a further two-year course leading to a Leaving Certificate examination).

Private Schools

4. Private schools attended by children of statutory school age must be certified by the Minister for Education as efficient (taking into account the standard of instruction, qualifications of the teachers, suitability of school premises, and general conduct of the school). Private secondary schools must also be registered for the education of pupils holding State bursaries under the Bursary Endowment Act, 1912. Certified schools at private charitable institutions are included in statistics of private schools; business schools, ecclesiastical seminaries, and nursery schools and kindergartens are not included.

Technical Colleges

5. The statistics of technical colleges relate to government technical colleges and associated training centres, which are administered by the Department of Technical Education, and include Canberra Technical College. The New South Wales Institute of Technology is excluded. Enrolments represent the number of students enrolled in each course during the whole or any part of the year, students enrolled in more than one course being counted once for each course. The figures of correspondence student enrolments for the years 1970 and 1971 are not comparable with those for earlier years because of substantial changes in the methods of compiling details of these enrolments.

Universities

6. In tables relating to universities, the term "enrolments" represents the number of students enrolled in each course (during the whole or part of the year). Students enrolled in more than one course are counted once for each course.

Section II—PUBLIC HEALTH AND SOCIAL SERVICES

Public and Private Hospital Services and Psychiatric Centres

1. Statistics of Public Hospitals and Homes relate only to the hospitals and homes supervised by the Hospitals Commission of New South Wales. Psychiatric centres, hospitals and homes conducted by the Department of Health, repatriation hospitals, and military hospitals are excluded. The statistics of Public Hospital Services, in addition to Public Hospitals and Homes, include other organisations which are subsidised by the Commission (i.e., those which are included on the Second or Third Schedules of the Public Hospitals Act, 1929).
2. In accordance with the Private Hospitals Act, 1908, private hospitals and nursing homes may be conducted only under a licence issued annually by the Hospitals Commission of N.S.W., which is also responsible for their inspection and control. Private nursing homes provide nursing care for convalescents, the aged, and those chronically ill but needing little medical care.

EXPLANATORY NOTES (continued)

Section II—PUBLIC HEALTH AND SOCIAL SERVICES (continued)

3. Psychiatric Centres include all State psychiatric institutions and authorised private psychiatric hospitals, and the psychiatric units of certain general hospitals. A psychiatric hospital and associated admission centre are regarded as one psychiatric centre. For statistical purposes, all psychiatric centres in New South Wales are regarded as comprising a single Psychiatric Service. Admissions and discharges are identified in relation to the Service as a whole, and not in relation to a particular psychiatric centre. The statistics of patients have been based on the results of a census of patients on the in-patient registers of psychiatric centres at 30 June 1964 and on particulars of each admission to and discharge from a centre since that date. The details of beds and patients in the psychiatric units of general hospitals and in certain clinics are duplicated in the statistics of hospitals and homes shown elsewhere in this Section.

Adoptions

4. Adoptions relate to orders for the adoption of a child made under the Adoption of Children Act, 1965, by the Supreme Court of New South Wales. The figures for any year relate to orders for adoption signed in that year. This factor must be borne in mind when comparing figures for different years, as administrative changes and special circumstances in particular cases can affect the number of orders signed in a year. Age of adopted child (namely, the age of the child at the date the adoption order was signed) is particularly liable to be affected by factors which can vary from year to year. Babies are normally placed with prospective adoptive parents within four weeks of birth, and the order for adoption is signed subsequently if the Court approves the placement.

Section III—LAW AND CRIME

Matrimonial Causes

1. Jurisdiction in matrimonial causes was first conferred on the Supreme Court by the Matrimonial Causes Act passed by the State Parliament in 1873. Prior to this date, there was no provision for the dissolution of marriage in New South Wales.
2. The State legislation being administered by the Court was superseded by the Matrimonial Causes Act which was passed by the Commonwealth Parliament in 1959 and which came into operation on 1 February 1961. Where a matrimonial cause had been instituted under State legislation but not completed before 1 February 1961, the transitional provisions of the 1959 Act gave petitioners the advantages of the new Act without detracting from their position under the former legislation.
3. The (Commonwealth) Matrimonial Causes Act, 1959–1966, provided a uniform law throughout Australia with respect to dissolution of marriage and other matrimonial causes. The Supreme Courts of the Australian States and Territories were invested with jurisdiction to hear and determine causes under the Act.

Higher Criminal Courts

4. The higher criminal courts which exercise original jurisdiction in New South Wales comprise the Supreme Court (the Central Criminal Court, which sits in Sydney, and the Supreme Court sitting in other centres) and the Courts of Quarter Sessions. Accused persons are tried before these courts on indictment by the Attorney-General, normally after preliminary enquiry in a lower court into the sufficiency of evidence to warrant a trial. Appeals from decisions of the higher criminal courts may be made to the Court of Criminal Appeal and, in certain circumstances, an appeal from this Court may be made to the High Court of Australia or to the Privy Council. The statistics of higher criminal courts do not cover appeals from Courts of Petty Sessions.

EXPLANATORY NOTES (continued)

Section III—LAW AND CRIME (continued)

5. Statistics of Persons Dealt With, for 1968 and subsequent years, relate to persons whose committal to a higher criminal court for trial or sentence has been "dealt with" in the year under review. If a person has been committed more than once, he is included in the statistics once for each committal "dealt with" in the year. A committal is taken to have been "dealt with" when it is not proceeded with to trial or sentence for any reason or the accused is acquitted or convicted (including sentenced, if a plea of guilty is made). No account has been taken of any variation of the original verdict or sentence resulting from a subsequent appeal. For years prior to 1968, statistics were compiled in respect of persons tried by the higher criminal courts—the statistics are broadly comparable with the current series.
6. In statistics relating to Distinct Persons Dealt With, persons who have been dealt with by higher criminal courts more than once in a year are counted only once—and where classified by offence, have been allocated to the most serious offence for which they have been convicted, or if acquitted, to the most serious offence for which they have been tried. The number of Distinct Persons Tried relate to persons dealt with by the higher criminal courts in respect of whom the committal was proceeded with to trial (or to sentence in the case of a person who pleaded guilty). Statistics of Distinct Persons Convicted include persons found not guilty on the grounds of insanity at the time the offence was committed, and ordered to be detained during the Governor's Pleasure.
7. Owing to difficulties in establishing revised collection procedures in 1968 there is a measure of understatement in the number of persons dealt with by the courts in 1968. This understatement would have accounted for approximately half the recorded increase of 545 between 1968 and 1969.
8. The Periodic Detention Act, 1970, which came into effect in February 1971, provides for certain males to be sentenced to periodic detention for periods ranging from 3 to 12 months. Males sentenced to periodic detention are required to spend each week-end of their sentence under custody, returning to their normal routine from Monday to Friday.

Courts of Petty Sessions and Children's Courts

9. Statistics of Charges and Convictions relate to all informations laid against an individual which were dealt with during the year shown. Where more than one information was laid against a person he is included in the statistics once for each information dealt with during the year.

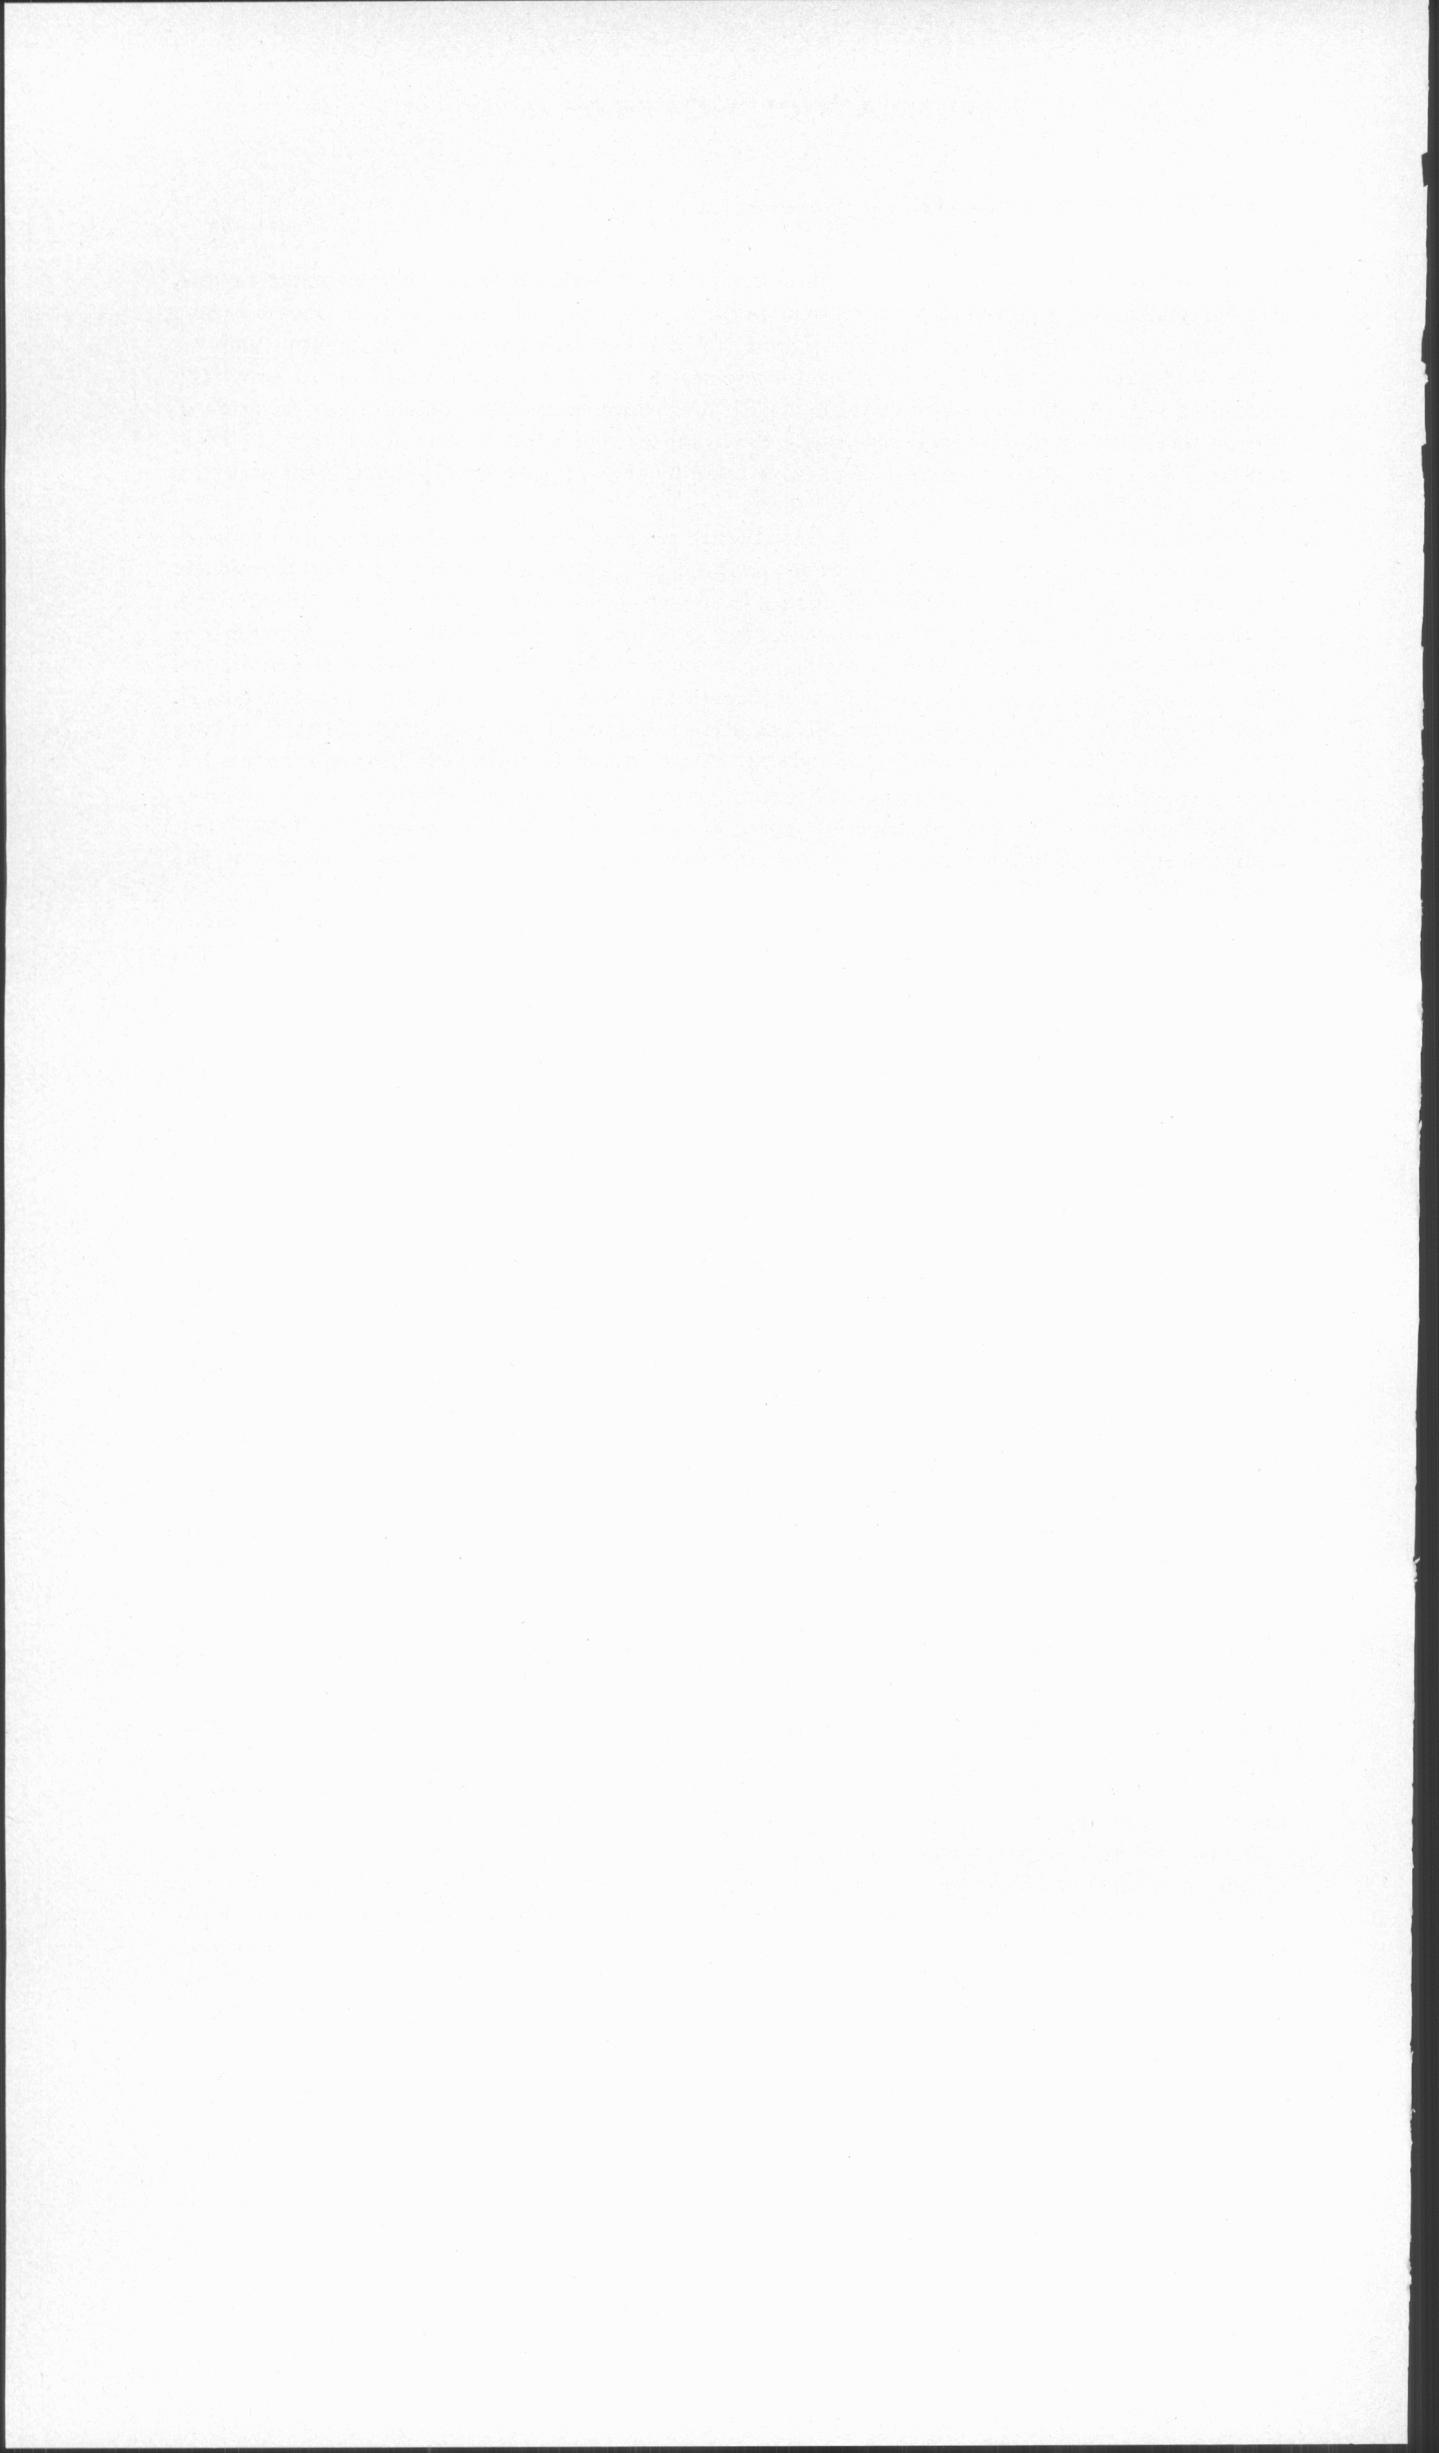

Prison Statistics

10. The basis of compiling statistics of persons held in custody in prison was changed from 1 July 1970. As a result the statistics of the number of persons recorded as received into, and released from, custody during 1970–71 are not strictly comparable with the figures compiled for earlier years. The break in comparability arises from the introduction of the concept of a "prison episode" and the counting of persons each time they are received or released in respect of such an episode. Part of the increase in 1970–71 in the numbers received and released, particularly in respect of persons serving short sentences, is due to this change of basis. In general, prison episodes are divided into—

(i) episodes not under sentence, which comprise all continuous periods in custody not under sentence;

(ii) episodes under sentence, which comprise all continuous periods in custody under sentence.

The new concept is explained in detail in the mimeographed publication *New South Wales Prison Statistics 1970–71*. The particulars recorded for a "prison episode" at the time of receipt of the person into custody are up-dated in the light of any subsequent court hearings during the course of the episode. The data tabulated for a "prison episode" in respect of "offence" and "sentence imposed" relate to the offence(s) and sentence(s) as reported at the time of termination of the episode (or 30 June, if the episode had not terminated by the end of the financial year to which the statistics relate). Transfers between gaols are not regarded as admissions or releases. An "offence" refers to a particular category of crime—a person may be held in custody in respect of one or a number of charges of an offence. Where a person is held in custody in respect of two or more offences (e.g., robbery, and larceny of a motor vehicle) the offence for which the severest penalty had been imposed is selected for tabulation. "Sentence imposed", in respect of a prison "episode under sentence", is the maximum length of time the person concerned may be held in custody. Cumulative sentences are taken as equal to their united length: concurrent sentences are taken as equal to one of them or to the larger if they are of unequal length.

* Composite courses in secondary education are provided at public primary schools in districts where secondary schools are not readily accessible. In 1971, this type of instruction was provided for 161 pupils.

† Central schools and the Correspondence school include both a primary and a secondary department.

‡ High schools are separate units providing a full secondary course of six years. "Secondary" schools are separate units providing secondary instruction for three or more years. Other secondary schools are separate secondary units being developed into high schools or "secondary" schools.

¶ Schools offering courses of 10 days duration in recreational activities, attended by pupils enrolled at other types of school.

Includes Canberra Technical College.

† From 1963, at 30 June; before 1963, at 31 December.

‡ Part-time teachers who teach more than one subject are counted once for each subject taught.

¶ Includes lecturers at the N.S.W. Institute of Technology, particulars of whom are not available separately.

\$ Not strictly comparable with earlier years because of a change in the method of compiling details of enrolments of correspondence students. This change resulted in a substantial decrease in the recorded enrolments of correspondence students.

* Payable to a single, widowed, or divorced pensioner or a pensioner married to a person not receiving an aged or invalid pension, service pension, wife's pension, or tuberculosis allowance, and, in certain circumstances, to each of a married pensioner couple who are living apart.

† Before October 1965, these additional amounts were payable only to pensioners who were invalids.

‡ Available to an unmarried pensioner with one or more dependent children.

†† "Dependent children" are those who are being maintained by a pensioner and who are under age 16 years or, since November 1963, are full-time students (aged 16 and under 18 years for the period November 1963 to September 1965, and since then aged 16 and under 21 years).

¶ Not subject to means test until October 1968.

|| Payable to the non-pensioner wife of a pensioner who is permanently incapacitated for work and to the non-pensioner wife of an age pensioner with one or more dependent children.

** Payable (subject to a special means test since October 1965) to pensioners who are receiving pension at the maximum standard rate or (since October 1972) at the married rate, and who pay rent or pay for board and lodging.

†† Limit which, assuming property is less than \$420, permits payment of maximum pension.

‡‡ Limit which, assuming income is nil, precludes payment of any pension. The limit for a pensioner entitled to a guardian's allowance and/or additional pension for children is higher.

¶¶ \$6 if there is a child under 6 years of age or an invalid child.

§§ From October 1972, the wife of an age or invalid pensioner (not herself being an age, invalid, or service pensioner and not living apart from her husband) may receive a wife's pension.

||| The payment of wife's allowance was discontinued in October 1972—see note §§ above.

No. 3. Consumer Price Index, 1954 to 1972

Base of each Group Index: 1966-67 = 100.0

The Consumer Price Index is designed to measure quarterly variations in the level of retail prices for goods and services which represent a high proportion of the expenditure of wage-earner households. The Index covers a large and representative selection of commodities and services arranged in five major groups—food, clothing and drapery, housing, household supplies and equipment, and a miscellaneous group. Significant changes in consumer expenditure patterns have been reflected in the Index by the introduction of additional items and altered weighting patterns.

* The amounts shown to February 1959 represent the basic wage together with so much of any margin and any further amount necessary to make the minimum wage payable equivalent to 75 per cent of the basic wage for males. Following the increase in the basic wage to the 75 per cent equivalent, the amount shown from February 1959 is the basic wage exclusive of any margin. This change was applied in State Awards from different dates, beginning in March 1959.

† Quarterly adjustments for movements in retail prices were discontinued in State Awards from June 1964.

‡ The minimum wage payable to adult males under certain Commonwealth awards was fixed at \$37.25 from July 1966, \$38.25 from July 1967, \$39.60 from October 1968, \$43.10 from December 1969, and \$47.10 from January 1971.

¶ In addition, an "economic loading" of \$1 per week was payable to all adult males and females under State awards. From 1 January 1968, this loading was absorbed into the basic wage.

§ From July 1967, the separate specification of the basic wage, margin, and other elements of award wage rates in Commonwealth awards was discontinued. The total wage (i.e., basic wage plus margin elements) for each award classification for adult males and females was increased from the beginning of the first pay period commencing on or after 1 July 1967 by \$1 per week, by a further \$1.35 from the beginning of the first pay period commencing on or after 25 October 1968, by 3 per cent from the beginning of the first pay period commencing on or after 19 December 1969, and by 6 per cent from the beginning of the first pay period commencing on or after 1 January 1971.

No. 5. Weighted Average Minimum Weekly and Hourly Wage Rates, N.S.W., 1939 to 1971

Notes:-

1. The indexes of minimum wage rates embrace a representative range of occupations and are based on the occupation and industry structures in 1954. The weekly wage rates used in the indexes are the lowest rates payable for a particular occupation for a full week's work (excluding overtime), as prescribed in representative industrial awards, determinations, and agreements. The relevant rates of prescribed "minimum wage for adult males" (see notes to Table 4) are used where applicable. The hourly wage rates are obtained by relating the weekly wage rates and the weekly hours of work prescribed in awards, etc. The rural industries are excluded from the indexes.

2. The money amounts shown should not be regarded as actual current averages, but as an index of changes expressed in money terms.

No. 7. Minimum Rates of Wages in Various Industries, Sydney, 1970 and 1971

Notes:—

1. Rates shown are generally those provided in awards, determinations, or agreements for a full week's work (excluding overtime) for adult employees in Sydney. For some occupations more than one wage rate is quoted, indicating that there are different classes or grades of work, or that different rates are payable according to locality. Where only two rates are specified they are shown in the form \$41.10 and \$42.15. In other cases the rates are shown in the form \$45.10 to \$54.85, indicating that, in addition to the two rates specified, certain intermediate rates are also prescribed. The rates of pay quoted may be subject to revision due to retrospective adjustments to awards, etc.
2. The forty-hour week was prescribed by Act of the Parliament of New South Wales as the standard for industries within State jurisdiction as from 1 July 1947, and by judgment of the Commonwealth Court for persons working under Commonwealth awards and agreements from the first pay period in January 1948. Except where indicated by footnote, the hours in industries for which wages are shown are 40 per week.

* Total earnings divided by total civilian employees expressed in male units. "Earnings" includes salaries, wages at award rates, overtime, overaward and bonus payments, commissions, payments made in advance or retrospectively during the period specified, etc., but excludes payments to members of the Defence Forces. "Male units" represent total male employees plus a proportion of female employees based on the approximate ratio of female to male earnings.

† Includes Australian Capital Territory.

‡ New series from September 1966, the effect of which has been a slight rise in the level of the average weekly earnings series.

Note. Comparisons as to trend should be made for complete years or corresponding quarters, as the quarters are affected by seasonal influences.
